You already know how to create cartoon videos.

This product teaches you how to turn that skill into a repeatable system that grows and earns.

This is NOT about:

Random uploads

Guesswork

One-time videos

This is about:

🔗 Consistency, automation, and monetization

## MODULE 1

### THE COMPLETE CARTOON VIDEO AUTOMATION SYSTEM

#### The Big Picture Workflow

This is the exact workflow you will repeat every week:

Story idea selection

Image preparation

Cartoon image creation

Video generation

Editing

Upload & promotion

Instead of thinking every day, you follow a fixed system.

## The Golden Rule of Automation

“Do the same task for multiple videos in one session.”

This alone saves hours every week.

## MODULE 2

## BATCH CONTENT CREATION METHOD

### How Batching Works

Instead of making 1 video at a time:

Day 1: Prepare stories for 5 videos

Day 2: Create cartoon images for all 5

Day 3: Generate all video clips

Day 4: Edit all videos

Day 5: Upload & schedule

This reduces:

Mental fatigue

Burnout

Time waste

### Recommended Batch Size

Beginners: 3-5 videos

Intermediate: 7-10 videos

Quality always comes first.

## MODULE 3
